In case my stories dont match up. I told you in my email that i had dated a few guys, but in our talk you asked me if any relationships after kevin and I said no. I didnt really have the time for a relationship so dating a few times never went anywhere and eventually stopped. I have not had a boyfriend since kevin because i have been swamped with this court mess and no time to commit to a relationship. Who ever id be in a relationship with would be dragged along my court dramas and who wants to do that? If i lived in Skokie i bet this would have been solved a long time ago. This areas government is lacking. Also fyi. I was kevins first serious relationship.

I have a court date for a false charge from the biased peru police department tomorrow. They claimed i commited a battery and charged me. Based on what kevin said. He said i pushed him but i didnt. It was hearsay but police asked states attorney to charge me seemingly because they r friends with kevins parents and trying to help them out any way they can. They had no grounds to charge me and kevin even asked them not to because he knew i didnt really push him. I had to hire an attorney and have court on that as well tomorrow.

Madeline is scheduled to go on visitation from Thursday to Sunday with sexual abusers, being exposed to that. Do you feel as of right now there is anything that I can to to protect her? Would it be okay if i not let her go, or can you talk to dcfs to get some type of temporary protective method figured out? She is very much in danger of long term damage. She is coming of age four where she is really remembering and being formed. If we keep exposing her, mass damage is being done. Let me know what i should do. I hate to let her go for four days when I know shes being sexually abused.

Sorry to bother you again. This female psychologist I know told me that some times psychologists may not get paid through insurance if they don't diagnose the client with something. If this is a pertinent stipulation, Please don't let that be the case with me & Let me be an exception. If there is nothing please be honest and careful not to diagnose me for insurance purposes. If this applies to you, as im not sure if it does apply to all psychogists, my grandmother and I can certainly take care of making sure you are paid. Thank You Mr. Alexander Paret. I hope you understand.

Good Morning Julia,

I think it is very important that you understand my role and capacity at this time. I am not able to provide you with any advice regarding what you should do with Madeline. My role is to submit to you and your attorneys a report that reviews all of the information that you have gathered, address your concerns regarding your daughter, evaluate you for diagnostic impressions, and come up with an expert opinion if Madeline's behaviors and verbalizations substantially correlate with known research of children who have been sexually abused. Please let me know if you have any other questions.

Best regards,
Dr. Paret

To: Alexander Paret <Drparet@paretandassociates.com>;

Good Afternoon, Dr. Paret.

Similar Cases:
I admire what you do and curiously wanted to see if I could find similar cited cases where you are the expert testimony. I found the case of United States v. Rodrigues-Lopez, and it states that he was diagnosed as showing psychomatic symptoms like paranoia, grandiosity and delusional ideation. After reading that I began to question if had given you the right impression of me during out talks. I don't think that you feel adversely of me, but in a situation as life changing as this, it doesn't hurt to make sure.

The discussions we had:
In one of our conversations, you asked me if I believed that a person can be capable of hearing another's thoughts or project their own thoughts to someone else. I may not have realized that you were looking for such signs as the above listed case within me and I began to openly talk with you about things I had seen and people I knew which believed things similar to that. I do not actually believe these things myself though and I just wanted to clarify that. I had mentioned a book to you that I knew in where an indian yogi wrote about his teacher showing he had some kind of psychic powers. That book is called The Autobiography of a yogi, by Paramhansa Yogananda. The book was shown to me by Kevin. He acquired the book while attending a psychic/ meditation type course at the Temple of Kriya yoga in Chicago Il, while he attended school there. So I was simply stating that I knew someone else who believed that but not necessarily that I believed it for myself. I also mentioned that I knew a psychic. Kevin introduced me to that said person. Before Kevin I was not open minded to these types of things, but Kevin was really into it, and had friends who also were believed in magic etc. Kevin introduced me to his friends like this, including that lady who did the divination for Madeline's birth name and the psychic that I knew and explained that I had lived with for a while. They may believe in psycic powers, and I may have known them, but I am not a scientist so I cannot say if I believe these things or that they are true because I have not actually seen proof of their existence. I only believe things that exist or can be scientifically proven. I guess I shouldn't have answered that I was open minded, although is that a bad thing to be open minded? You said yourself that the mind is a very powerful thing and we can be surprised as to what it is capable of, thus I am interested in learning more but have no educated opinion.

Before Kevin, I was not connected, open minded nor a fervent believer in any type of psychic phenomena. The only yoga I did was used as a physical workout. Kevin was said to be known to prey on weak girls with ailments and when I met him, I was recovering from a surgery. I feel as though If I was not in that state, I would not have considered his beliefs and after fully recovering I found myself to disagree with a lot his beliefs. I consider my relationship with Kevin, and that time in my life as I was healing from a surgery, off beat and not normally what I am interested in. I am explaining this to you in hopes to trying to do some damage control in case I was misunderstood. Don't hesitate to ask me any more questions in case you need clarity.

Personality test:
You asked me why I felt that you had to give me a personality test. I explained that I felt you had to do this so that you can make your report for my daughter. Why exactly do you have to though? Is it going to be the same in depth 215 exam that I will get as my 215 court appointed exam from the psychologist that Kevin and his attorney chose - Jane Valez from Peoria Illinois. Will it differ from what you have done? With your level of expertise, do you

feel that it would be helpful for you to do the entire custody evaluation so that you can better asses and compare the differences, strengths and weaknesses of each parent compared to having three separate psychologists be able to offer varied opinions?

Future success for me and my daughter:

Going through my court saga situation has shown me there is a need for more child protection through the law and forensic child psychology. I had previously considered going on to study forensic child psychology after completing paralegal school in hoped that I could assist with writing new laws for bettering child protecting after receiving degrees in both law and forensic child psychology. I had plans to move to a better town and continue my education while selling cars and real-estate to provide for me and my daughter. If this psychological evaluation goes awry for me, I feel it could impact my ability to achieve the level of success that I want for myself and my daughter. I want my daughter and I to have the best, similar to your level of success. You are a GREAT example. She deserves the best and I hope that I can proceed with my education to attain that level of success for the both of us.

More about Madeline's sexual abuse signs, and healing while in my care:

Also. I want to inform you more about the situation with Madeline, her abuse signs from the father and when she comes back to me. From the time she was born, I have worked with her doing birth trauma healing. I continue to work with her and heal her the best I can be including when she comes back form her fathers. That could be why she heals so fast in my care or be the reason why she maybe shows lesser symptoms than other children in similarly abusive situations because I work on healing her so much. I wanted you to be aware of this.

Also, the DCFS worker who agreed that a minimal 10 minute CAC interview would be sufficient to gain a disclosure from my daughter about sexual abuse, seemed to look for any reason to say it's not going on and ignore the evidence and witnesses which offered proof the sexual abuse existed. Tim Kohn was present when the DCFS worker claimed that Madeline's signs could be written off as a food allergy, despite the disclosures, and sexual nature from an inappropriate age. There is no way it could be a food allergy. One of the reasons me and Kevin got together was because we ate the same foods. We live in the same town, shop at the same grocery store and eat and feed Madeline the same foods. Madeline has never been sick any other time other than stress induced trauma after being with the father. She has never had a regular cold, illness or food allergy otherwise the doctor would have diagnosed that. It seemed like the DCFS worker was looking for ways not to help or do her job when the child was clearly showing signs. I believe signs of abuse and a food allergy very probably quite vastly.

I just wanted to share this information with you, as this process and my daughter are very important to me. I'm waiting on a few more documents so I can send you the documents you want.

Thank you for your time, Doctor Paret.

Sincerely, Julia Eickmeier

To: Drparet@paretandassociates.com <Drparet@paretandassociates.com>;

Dr. Paret,

If I got type B results from the personality test, could my current stressful situation and having been in a three yearlong court battle contributed to such a misreading? I really don't feel that I am a b type personality and that I have simply been reacting to abuse and a three yearlong court battle, while raising a baby and fearing for both of our safeties. I should not have answered from the perception of my court battles but during the court experience I have been expected to speak up for, stand up for and defend my daughter and myself which is far beyond the call of duty and extra stress onto of early motherhood. During court proceedings I felt that I needed to show that I was strong, capable and assertive enough so that the judge would know that I was capable of handling the ups and down of parenthood in the case I was being considered for having the best to serve the child's best interest if there was question that I could handle full custody. If that situation ever arised, the has to know that I am not weak and that the child is safe with me.

There are 260 pages of police reports, DCFS neglect, Police harassment and bias, and more. I feel I am a victim of abuse from authorities as well and it's not fair for me to be misread psychologically because I have been caused undue stress and instead I really wish to be understood.

As a doctor, you know stress and trauma can alter a person. Let's say a person is in a state of panic or fear because of abuse. Do you label them as being that way all the time or explain how they are being affected only temporarily? I don't think it's fair to expect accurate personality test results showing who I really am when I am in a state of defense, trauma and shock from this three year long stressful time of pain and suffering. If my test results seemed like my current situation could be a contributor, I'd like a retake the test, or to talk with you to gain specification if certain things are really who I am or just a temporary result from my stressors. I don't see why you shouldn't be able to deliver a positive personality test about me me in your report or at least offer an explanation in defense or support of me by stating how an average person would react to the stressful situation that I am in, and how I have shown considerable strength under such circumstances. Can you please defend me on this and/or help me understand how to take a better future test? I will be expected to take another one from the female psychologist and I don't deserve to be misunderstood or victimized. You can assist me in explaining if I misread and how my situation contributed to this so that I am not harmed or misunderstood by this future psychologist. Her curriculum vitae looks very small compared to yours and I obviously trust and need you way more than I do her.

I read your Curriculum vitae and It is very impressive. You are a very interesting person. I enjoyed seeing that you have a history of working at schools and with children. I admire that you care about children and seem to value their innocence the same way that I do. Your CV says that you're also a practicing medical doctor and pharmelogical psychologist? Does that mean that you can prescribe me? I value your input and am open to these other types services if you want to provide them. I was not expecting to be so impressed by your or like you so much personally, when choosing you for my daughter. I did pick you because I want the best for her but I didn't know that I would also benefit so much from my choice or that I would like and trust you so much as for helping me in also concerned. You are capable of more than I thought, Doctor. I was not expecting to see you had a vast skill set and I'm impressed and intrigued by your intelligence, experience, and capabilities. If you don't

mind, I would probably refer many people to you including my brother after he gets out of prison. I think you're great. You are very renound as it states you are one of the most famous psychologist in the Skokie area, on the internet. Your career is very captivating. It's amazing that you work on high level criminal cases and with the courts but you also do many other things. Finding out more about you and your career has absolutely fascinated me. I have a lot of respect for you and your career. I watched a few you tube videos last night about forensic psychology which blew my mind, and that is when I realized that your job can be very challenging and also that I am probably one of your more enjoyable clients. I am sincerely grateful for the hard work you have done to get where you are at and that you are capable of and willing to help me and my beautiful, innocent child.

Thank you Dr. Alexander Paret.

Respectfully yours, Julia Eickmeier.

Good Morning Julia,

I'm not sure why you are sending me this link. What exactly does he believe in that you are questioning if you should too?

Regarding all of the records we discussed, please send me what you have, and as the others come in, you can send them at that time.

Many thanks,
Dr. Paret

Hello, I was just asking if you thought he was qualified to talk about those types of subjects and also if clients get insulted for being into similar topics like that author and doctor.
Also, this morning I meant to send you two more messages and see they are written but didnt send. One of the things I was going to write you was adressing my family issues at a later time, the other about the abortion in case you planned on including that in your report. I am feeling suspenseful and curious about what youll write in the report. If you want me to send the earlier emails to I can, if not I wont. Just let me know. I am hoping for the best to have my daughter protected and am glad I was able to find a doctor uniquely suited to care about and provide for this necessity.

Thank you for your help

I dont think you or I think foster care is necessary though, i was just making a point.

As far as finances are concerned, the person Im in the car sales business with, we expect to make 5,000 by the end of this week and continue this line of work. I also have the cleaning business and realestate position as. Back up. I am financially well off enough to care for Maddy and allow myself time to work on my case as well. Also my grandmother bless her heart has spent about 8,000 the past month on fees surrounding this case just so you know a little more about my financial position.

When madeline returned from this last four day weekend she was rubbing toys on her genitals, avoided and was afraid of bed and bath time. She said she was afraid because she kept getting woken up during her sleep at her dads and that he was doing something to her under the blanket. The next day she was terrified to take a bath, and while poking a pen at a toy cats crotch, she said thats what daddy was doing to her and why she was afraid. She seemed to be disassociating when telling the story as she reffered to her and daddy, as charachters.

I am sorry, there was another email proceeding the point being made about not needing foster care. Some of the emails i sent u were going to myself. The email was just saying that I would trust Madeline on your familys cate but no foster home. And either way her behaviors could influence other children and it would pose a problem. I was just complimenting that I feel youre satisfactory and could provide an element of safety for my daughter. Im not going to send you that original message but i will send you the ones about my family and abortion if you wish. I am having computer mishaps and am at staples fixing it now.

I wish I could call and talk so you can hear my sincerity. Sorry about the mix ups yesterday. Nothing is wrong with me. I just have myself tied up with maddy, trying to be there the best I can for her. Visitation coming up. I have my work cut out for me. Lots of documenting and producing files. I have been having attorney problems lately causing me an even greater headache of possibly needing to get a new one. Like its not hard enough being a single mom when your kid is being abused and no help given yet. Its very stressful. Attorneys are arguing with me. Wasting my time and pulling my chain. I may need to hire a new one. Do you have any reccomendations for attorneys that work well with you? Anyways. Please dont write anything bad about me in your report because. That will totally work against Madelines best interests. I am her only good parent and if we stifle me we stifle her. If u write bad things about me.... then since i have to see this other psychologist, i am already at risk for her saying bad things. So i dont need two psychologist saying bad thing. I feel like psychologists may always look for something negative to say about the client in the court realm. I didnt come to you for that. You caught me off guard that first day. So please dont make this about me in your report. I am trying to help Madeline. Let me know if you have any attorney reccomendations. Its upsetting that the time I need to spend with my daughter, I am called to work on court stuff.

Dr. Alexander Paret,

I wanted to get it in writing, that Madeline and I are done with your services. We will not be meeting with you any more. Please do not talk to any of my attorneys any more. I do not give you permission to speak on me or my daughters behalf. I ask that you not enter any opinions or reports to the court as your purpose and investigation is misunderstood and incomplete. I Ask that you stop working on our case completely. You lied to me that you were evaluating my daughter, and gave me a recipet for me retaining you for that purpose. The phone conversation we just had you told me that I hired you to evaluate me and that is not the case. Do not move forward on my behalf from here on out. I do not give you permission. You are misinformed and it would not be in me or my daughters interests for you to discuss anything about our situation to any body. Please do not talk about our situation to anyone else. Please send me back all of the records I have given you. Also the emails I have sent you are privleaged and confidential, do not show any of them to anyone. I will be getting you off of the requested evaluater sheet from the courts. You are not needed any further.
Your services are thus terminated.

Please send an email back confirming that you understand this.

Julia Eickmeier.

See. This stuff happens all the time.

Alex Paret,

Due to the nature of how you tried to trick me into having you do an investigation on me, and write a report about me to the courts, when I hired you to evaluate and write a report about my daughter, which I have the receipt from you, and as you doing this was improper, I think it is only fair for you to also return the full and unreasonable $5,000.00 that you charged me. If you wish to go more into details about this I am fully ready and able to do that.

You can send all of the information, documents, folders, papers and files along with the refund of 5,000.00 to my mailing address which is as follows:

Hello Julia,

Per our conversation on September 23rd, you requested I not complete your report and submit, which I am quite willing to do. I have spent well over 30 hours (including interview and testing) into this case, which is over and above the $5,000 that I received from you. Should you desire your copy of the report, I will be happy to provide the completed evaluation on your daughter with my professional opinion of her behaviors (from the information you shared and evidence you provided) and how they may or may not correlate to having been sexually abused. While I understand you are disappointed that I cannot provide the opinion you had hoped for, ethically I am obligated to report my findings as they are presented to me and I can in no way be swayed by money, bribery, or threats. All the information that I have is still discoverable if subpoenaed, but I will not actively approach anyone from this case with the information that I have on you or your daughter.

Best regards,

Dr. Paret

Alex Paret,

Due to the nature of how you tried to trick me into having you do an investigation on me, and write a report about me to the courts, when I hired you to evaluate and write a report about my daughter, which I have the receipt from you, and as you doing this was improper, I think it is only fair for you to also return the full and unreasonable $5,000.00 that you charged me. If you wish to go more into details about this I am fully ready and able to do that.

You can send all of the information, documents, folders, papers and files along with the refund of 5,000.00 to my mailing address which is as follows:

Julia Eickmeier

2830 4th St. #13

Peru, IL 61354

DCFS took Madeline, made the judge grant an order of protection against me, so I cannot see her at all, and placed her with her dad full time. He lives in a studio apartment. Sexual abuse has occured. DCFS lied on the stand and fabricated information to get the judge to approve the restraining order. Madeline was on a 6 hour visitation with her father only, and came back complaining of genital pain, upon changing her into clean clothes before bed, it appeared she had green crusty and gunky substance on her private area, and upon further inspection it seemed she needed medical attention. I called the doctors and she nurse prompted me to bring her in so they can test the gunk.

DCFS received the call against the father, but due to DCFS being corrupt, they quickly, without specimen results back, twisted the report they received against Kevin, made it against me, and founded me guilty of abuse within one business day. They told the judge I abused her and immediately placed her with her father, the one that caused this.
This is what I am dealing with right now and she has no advocate to make sure she is okay, safe and not being raped or harmed.

I have been trying to tell you all along that local authorities and DCFS were corrupt.
